O2 Web wins a High Tech Award at Fidéides 2022, an event celebrating successful businesses in the Quebec City area

Quebec City, November 7, 2022 – *O2 Web is pleased to announce that it recently accepted a Fidéides Award in the high-tech category. Organized by the Quebec chamber of commerce and industry (CCIQ), the Fidéides Awards honour local companies that post exceptional business results.*

On November 3, businesses from a wide range of industries attended the 39th edition of the Fidéides Gala, as the event is well-known and highly regarded by the business community in the Quebec City and Chaudière-Appalaches regions.

O2 Web received an award in the high-tech category, sponsored by Hydro-Québec, in recognition of its successful e-commerce solutions. The agency simplifies and optimizes e-commerce structures by redesigning architectures and integrating third-party systems. O2 Web's success lies in its ability to leverage the latest technological advances and its in-depth understanding of headless and microservices frameworks.

"Our team is truly honoured to receive this award. We put in a tremendous amount of hard work when the pandemic hit, and this makes it all worthwhile. We're equally proud of our Quebec roots and of being recognized by our peers in the local business community. It's a great accomplishment that confirms our leadership in the field of technological innovation," said Charles Guimont, President of O2 Web.

About O2 Web

Founded in Quebec City in 2006, O2 Web specializes in developing integrated e-commerce solutions that are both flexible and innovative for the B2B and B2C markets. The agency employs roughly 90 talented individuals and boasts Great Place to Work and Flow certification. The agency's clients include manufacturing companies and distributors (BRP, Master, Toromont CAT, etc.), major retailers (Must, Zadig & Voltaire, Patrick Morin, etc.) and large organizations (Cogeco, Arc'teryx, Thrasio, etc.). In all its dealings, O2 Web's commitment remains the same: helping clients effectively use new technologies to grow their business and achieve their full potential.
